

# Make Waves

*at Your Library*

## Water's Essential

**Water is essential to life.**

Do you find evidence in newspapers that demonstrates a growing concern over having enough water and/or clean water?

What are governments doing to ensure access to clean water?

What are individuals doing to conserve water and/or keep from polluting water?

### Visit Your Library!

Through research, what more do you learn about efforts to conserve water and/or clean up streams, rivers and oceans? What would you say to a friend to encourage them to conserve and not waste water?
